ESTUDIO MARISCAL

We updated the classic terrace chair, rethinking the traditional work with plant fibre.

Miralook is inspired by cane, wicker and woven fibre chairs, as can be seen in the wefts that shape the gaps. Miralook is like one of those terrace chairs from the past that has fossilised and been transformed into a polyethylene chair in colours, with holes and metal legs. It is a clear re-reading of the classic terrace chair, with the breeze passing between the gaps, and with a silhouette projected on the lengthening shadow of summer evenings. Miralook is a fossil memory.
