# ESTUDIO MARISCAL

---

**We went for the functionality and humour of an object that provides good lighting and company.**

These table and floor lamps, made in black painted metal, have quite a character. A very expressive character which, thanks to the ball and socket joints of the arm, adopts different positions that give the object functionality and humour: its hat (the shade) can be put on and taken off, its arms can be lifted or lowered, etc. A lamp which in addition to providing a nice light, offers company, which is good added value.
