ESTUDIO MARISCAL

We produced carpets that combine traditional craftsmanship with contemporary designs.

Our collaboration with Nani Marquina is a long-lasting one. She is one of the most internationally recognised carpet producers thanks to her quality, her stance for design and her commitment to collaboration and fair conditions with the craft workers in some villages in India.

The Istanbul carpet is part of the Black & White collection and is characterised by its absence of colour and the dual black and white nature to intensify its identity. The Bichos y Flores (Beasts and Flowers) collection is populated by naive beings that live on its surface, characters from a very personal story that stimulate the imagination of the youngest children. The Despertar (Wake-Up) collection is characterised by the irregular shape of its perimeter and abstract figures, in which Mariscal's gesture can be found.
