## We designed an affordable, comfortable, sustainable chair.

A chair with a 100% recycled plastic and 100% recyclable seat. A chair for contract selling or for small budgets, as the material and the manufacturing process are economical. The recycled material means that they are all the same colour, dark grey, but at the same time they are all different. Despite its coarse appearance, it has good ergonomics thanks to the polygonal geometry of the seat. To soften its texture, there is a high relief engraving that homogenises it and contrasts with the back of the chair. This displays a vein which gives its solidity and is also a formal resource. The legs are made of wood or painted metal.

The Green Chair is a project that was designed with the commitment to be affordable, pleasant and sustainable.
