ESTUDIO MARISCAL

We superimposed sheets of glass to create an organic shape.

A highly graphic light, in which Mariscal's style can be recognised. An organic shape which, thanks to a play of superimposing three sheets of coloured glass, offers tones and intensities of colour which are accentuated when it is turned on. It is designed for indoor areas, not just as a source of light but also as an iconic element that gives character to the space in which it is placed.
